YEARBOOK DEDICATION

The 1989 **CAMEO** is dedicated to a man who has devoted much time and energy in improving the quality of the educational program at North Sand Mountain High School. He joined the North Sand Mountain faculty in 1972 as a science teacher and basketball coach and assumed the position of principal in 1976. During his tenure as principal, NSM has experienced tremendous growth in the size of its school facilities with the addition of sixteen classrooms, a modern library, a large gymnasium and increased cafeteria space. Under his leadership the school also became accredited by the Southern Association of Schools and Colleges in the fall of 1986.

A Rosalie native, he is a graduate of Pisgah High School and Athens State College. He earned a Bachelor of Science degree in physical education in 1962 and acquired a M.S. degree in school administration in 1967. He is married to the former Judy Yates of Oak Ridge, TN and they are the parents of three sons: Junior, Mark and Kip. The family resides in Rosalie.

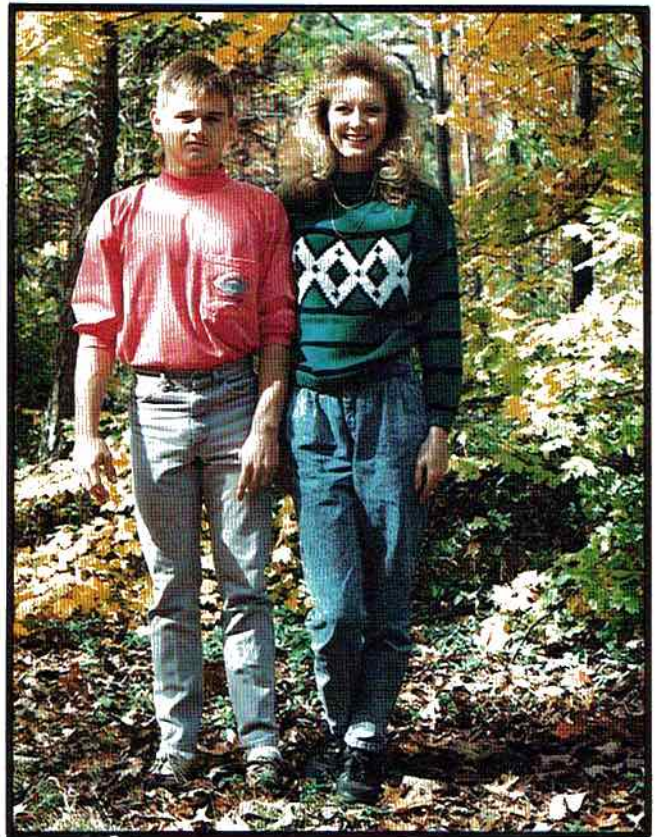

For his seventeen years of hard work and dedication to the students of North Sand Mountain High School and for his leadership in making NSM one of the finest schools in the Jackson County school system, the 1989 **CAMEO** is dedicated to **Mr. Jim Kirby**.

Precious Moments

HAPPY RETIREMENT

Miss Virginia Oleham retired at the end of the 1988-89 school year after teaching at North Sand Mountain for sixteen years. She was born in Leighton, Alabama in Colbert County to Thomas A. and Katie Moore Oleham. She started to school at age four and graduated from Colbert County High School in 1942.

She began her teaching career in 1960 at Hatton Elementary School where she taught for eight years before earning her college degree. Upon graduation from Florence State University in 1972, she taught sixth grade one year at Woodville High School. Coming to NSM in 1973, she spent 14 years teaching second graders before transferring to Chapter 1 reading in 1987.

Miss Oleham has traveled extensively in recent years, making two trips to Europe as well as visits to New York, Alaska and Hawaii.

Her years of hard work and dedication at NSM are greatly appreciated. She will long be remembered for her unique ability to make each student feel special. We wish her many years of health and happiness in retirement.

Rockin' the Night Away!!

Tonight a curtain closes,
And we take a final bow,
To the four years we have spent
Which are slowly ending now.
But let time stop this evening,
For just an hour or two
As we recall the memories
That seem, right now, too few.
And gathered all together,
We will not say "goodbye."
For thoughts that will prevail
With us, of you, will never die.

CHIYAKO MAEDA

Chiyako Maeda from Ichikawa-shi, Japan was an exchange student at NSM during the 1988-89 school year. During her stay in America her host family was Randy and Geraldine Hamilton who reside in Bryant.

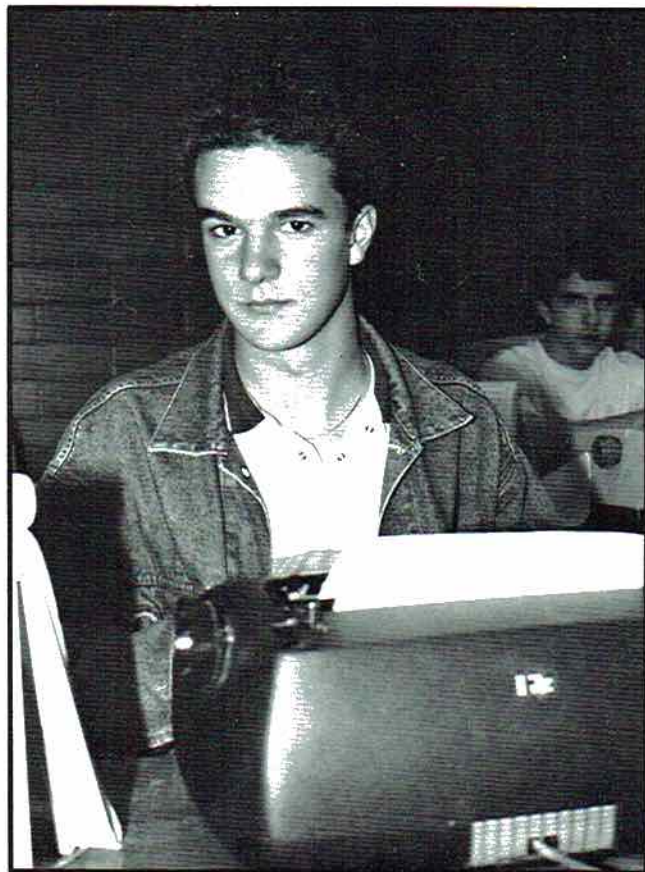

Her pastime activities include: playing and listening to music, writing poems, reading, art, playing basketball, and ice skating.

Chiyako described her stay in America as "a wonderful experience." When asked her opinion of NSM, she replied, "I've never been to a nicer school."

The students of NSM learned a great deal about life in Japan from her. We are proud Chiyako was a part of the 1988-89 junior class.

OLD RELIABLE

In 1940, the 78 percent of American families who had electricity used about 80 kilowatthours a month and paid about \$30 for it.

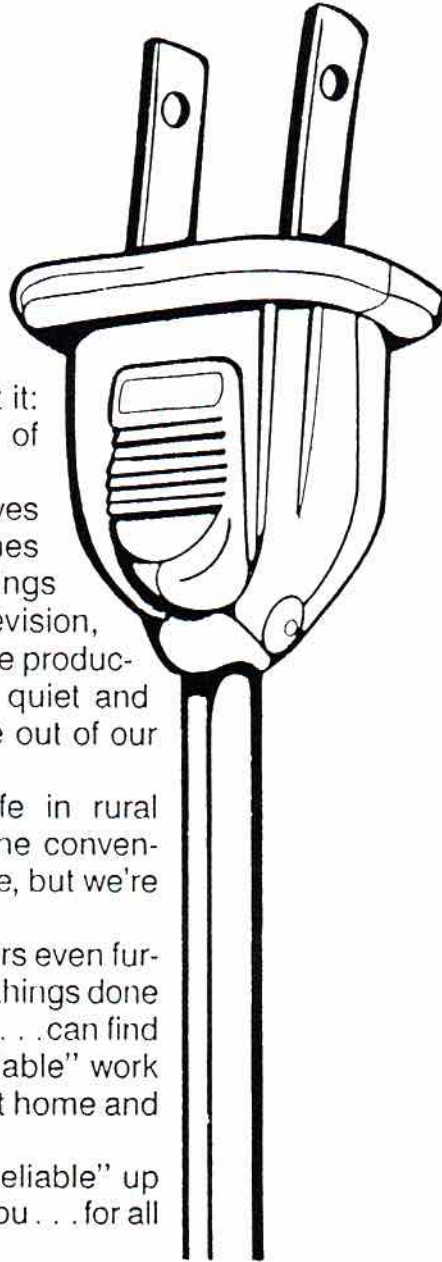

Today, the average rural American family served by a consumer-owned, nonprofit system like ours uses about 1,000 kilowatthours of electricity and pays about \$75 for it. It's hard to imagine life without it: it's our "old reliable" source of energy.

It cooks for us, heats for us, shaves us, cools for us, washes our clothes and dishes and dries our hair, brings us the wonder of radio and television, makes the workplace a safer, more productive place. It's always there, it's quiet and clean; and it takes a smaller bite out of our paychecks.

It's hard to imagine what life in rural America would be like without the convenience of electricity. It's a real value, but we're working to increase it.

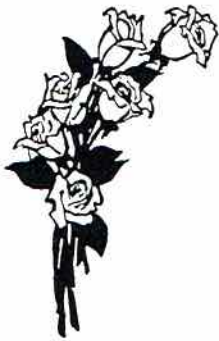

We can help stretch utility dollars even further. We can help find ways to get things done more efficiently and economically. . . can find innovative ways to make "old reliable" work harder for our consumers, both at home and on the job.

We are committed to keep "old reliable" up and running and efficient. . . for you . . . for all of us.
